

Member Development Policy

Southampton Canoe Club Strongly believes in supporting its members towards improving their knowledge and ability. This can be in the form of running training courses, coaching sessions or helping to finance the cost of a course. We would like to have strength and depth in the number and ability of coaches that we can deploy in order to improve the club as a whole.

If you would like funding towards a course you need to find out the cost of the course and when it is, please submit the cost and what the aim of the course is and the committee will then consider your request. Please note that the club will expect a return on its investment. Either in the case of a coaching course that you use it within the club or a knowledge based course the club will support you to present what you have learnt back to the club.

The committee will need to know about the course before the start in order to consider your approach presenting them with a 'fait accompli' will not normally be considered.
